*"A caring integrative approach for your pets"*

September 21, 2018

Dear Dr. Ulan

I am a veterinarian who, for about 15 years, has been investigating and using integrative medicine for my patients. I have gotten good results for most of them. But for some, I would only be able to obtain small results or just be able to maintain them so they did not get worse.

I had heard of muscle testing to evaluate supplements or herbs, but my personal experience left me with the thought that it was not real. Then came my journey toward Nutrition Response Testing. At the 2017 American Holistic Veterinary Medical Association Meeting, I saw Dr. Cameron Moorehead show us a brief demonstration of its use on pets. It peaked my interest because it was a SYSTEM that was repeatable. It also peaked my interest because it showed that ANYTHING can cause ANYTHING.

I then went to a weekend conference with Dr. Shannon Roznay in Columbus. During that conference, she did a body scan on me and put me on a program. After starting the program, within a very short time period, I noticed much more energy. My own health issues that I have had for years began to improve. I had to learn more!

My wife and I visited Dr. Moorehead in Georgia for a couple days to see more. Within a couple weeks of our visit, I was signed up to learn Nutrition Response Testing for myself. Now I have finished the first leg in the journey and have seen animal patients with chronic ailments improve at a level that I would not have been able to do without this training! Even though the technique is a long term adventure for each patient, the owners notice within a short period of time that their pets are feeling better.

Thank you for creating this system and I look forward to a lifetime of continuing the learning from Ulan Nutritional Systems!

Sincerely,

Jim Carlson, DVM
